Re: Rocky Flats Plant

Dear Mr. Whiteman,

This office has reviewed the cultural resource report completed for selected parcels of land within the Rocky Flats Plant.

We concur that the Lindsay Ranch, 5JF485, is not eligible to the National Register. This ranch was rebuilt after World War II and therefore has not reached the 50 year age criteria.

5JF512, 5JF513 and 5JF514 are ditches that have lost their integrity due to alterations and realignment. They are not eligible to the National Register.

5JF474, a possible homestead destroyed by a fire line, 5JF483, an orchard and 5JF484, a stone structure that has lost its integrity, are not eligible to the National Register. These sites are not associated with persons or events important in history.

Sites 5JF79 and 5JF217 consist of rock alignments and rock piles that have no cultural materials associated with them. Due to the uncertainty of their function and cultural association, we concur with the need to test these sites before a determination of eligibility is completed.

1/2

There will be no effect to significant cultural resources by further development within Rocky Flats provided sites 5JF79 and 5JF217 are avoided. If avoidance is not possible then a testing program will have to be initiated to determine their eligibility.

If we can be of further assistance please contact Jim Green at 866-4674.

Sincerely,

A handwritten signature in black ink that reads "Barbara Sudler". The script is cursive and fluid, with the first letter 'B' being particularly large and stylized.
